得分

Part I: Multiple Choice (2*20=40 points)

Directions: Choose the correct answer from A-D. Mark your answers on your ANSWER SHEET.

1. “ABC, CBS, NBC all cut away from Trump’s news conference on the election” — What do the acronyms of ABC, CBS, NBC in the above news headline refer to respectively?
A. American Broadcasting Company; Cross-Bank Solution; Nuclear, Biological and Chemical weapons
B. American-Born Chinese; Columbia Broadcasting Company; National Broadcasting Company
C. American Broadcasting Company; Columbia Broadcasting Company; National Broadcasting Company
D. American-Born Chinese; Cross-Bank Solution; Nuclear, Biological and Chemical weapons
2. Our model provides a biologically _____ way for artificial neural networks to learn new visual concepts from a small number of examples.
A. correct B. plausible C. interesting D. standard
3. John Preskill, a quantum-computing researcher, _____ such machines NISQS—Noisy, Intermediate-Scale Quantum computers.
A. dubs B. invents C. makes D. likes
4. Choose a shorter word with similar meaning of the underlined word in the headline: Conservatives Threaten to Make Gay Marriage 2022 Issue

- A. curb B. vow C. stem D. probe
5. Give the complete form of the underlined shortening in the headline below:
College Grads Face Tough Employment Market
- A. Graduates B. Grands C. Grades D. Gradual
6. This _____ of data flooding through our society will enable a host of new services, including connecting new devices and equipment.
- A. emergence B. appearance C. deluge D. advent
7. In terms of word formation, which following word is different from the others?
- A. Microsoft B. Motel C. Covidiot D. Minister
8. Now the French military has been given the _____ to create “augmented soldiers”.
- A. passport B. motivation C. ethics D. go-ahead
9. In terms of grammatical features of English news headline, which is the best among the following headlines?
- A. 37 Killed in an Italian Plane Crash B. Laurel and Aquino Cut Ties
C. Pope to Visit Japan in February D. Food Prices Are Soaring
10. Which one is NOT appropriate for a news headline in terms of lexical features of English news headline?
- A. College Grads Face Tough Employment Market
B. Allowance to Be Cut in 200,000 Families
C. Investigation of Violence, Mass Escapes from Egypt Prisons
D. Grassroots Heroes Aid HK’s Pandemic Fight
11. Which rhetorical device employed in each headline below is different from others?
- A. To Buy or Not to Buy Is the Question for Homebuyers
B. A Tale of Two Hearts
C. Farewell to Covid-19
D. The New Beetle Hits Town
12. Which one of the following statements is NOT correct?
- A. The Headline is the title of the article which is made up of 10 words or less.

- B. The Subheading, which is always included in an article, expands upon the Headline's content.
- C. The by-line includes the article's author's name, and sometimes that person's occupation
- D. The Summary Lead consists of the first paragraph; The content of this paragraph consists of the 5WH (who, what where, when, why, and how) of the article.
13. In terms of the differences between a News report and a Feature, which is NOT correct of the following statements?
- A. Features are not as time-dependent as News stories.
- B. A News story is longer than a Feature story.
- C. The lead of a Feature does not give the news instead; while the lead of a News story sells the story.
- D. a news story can end anywhere after the most important things have been mentioned, but a feature story has to be ended in specific manner.
14. We've reached the point now where we could potentially ____ people's DNA to breed into them extra strength.
- A. manipulate B. fabricate C. make up D. create
15. This material is _____ as a yield-stress fluid, meaning it begins as a semi-soft solid that holds its shape, like butter or toothpaste.
- A. symbolized B. categorized C. characterized D. described
16. Which translation for each headline below is NOT appropriate?
- A. Florida is Tight in Battle for 270: 佛罗里达为 270 激战正酣
- B. Son of the Soil: 大地之子
- C. World Corruption and Anti-Corruption: 席卷全球的腐败和反腐败斗争
- D. Here Comes the Son: 子承父业的小布什
17. These complex neural hierarchies for visual recognition allow humans to learn new tasks and, crucially, _____ prior learning.
- A. underscore B. recognize C. leverage D. generalize
18. Dr. Peter M. Glazer and his co-authors developed an _____ approach using a novel combination of nanoparticles, synthetic pieces of DNA, and a simple IV

injection.

A. different B. proper C. alternative D. new

19. The advance could fuel a variety of robotics applications, including, potentially, frontline medical care of _____ patients.

A. deadly B. contagious C. feeble D. dying

20. Replace each of the underlined words in the headlines below with a shortest possible midget. Which is Not right?

A. World Watches Mid-east Peace Talks: Observes

B. China, Japan Renew Relations: Ties

C. EEC Warns Nuclear Arms Spread: Nuke

D. Mayor Orders Fire Investigation: Probe

得 分

Part II: English-Chinese Translation (1*30 = 30 points)

*Directions: Translate the following paragraph into Chinese. Write your answers on the **Answer Sheet**.*

21. There are three differences between 5G and the current 4G: speed, bandwidth and what network specialists call latency, which is the time it takes for data to move from a server on the network to a device. 5G networks are faster, can handle a higher volume of data, and reduce wait times. The new technology is able to shoot data from millions of local sensors or gadgets to distant cloud computers for processing and then return the relevant guidance — all in a fraction of a second. This deluge of data flooding through our society will enable a host of new services, including connecting new devices and equipment.

得 分

Part III: News Summary (1*30 = 30 points)

*Directions: Read the following news report and write a news summary around 100 words, consisting of the 5WH (who, what where, when, why, and how) of the article. Write your answers on the **Answer Sheet**.*

22.

Scientists successfully grow plants in soil from the moon

In a NASA-funded study, scientists at the University of Florida grew plants in soil collected from the moon, according to a study published Thursday in the journal *Communications Biology*.

The study is paramount to NASA's long-term goals in human space exploration, NASA administrator Bill Nelson said in a press release. The research could also have implications for plants growing in harsh conditions on Earth, he added.

"We'll need to use resources found on the Moon and Mars to develop food sources for future astronauts living and operating in deep space," Nelson said. In the study, researchers planted the seeds of *Arabidopsis thaliana* — a plant related to mustard greens, as well as other cruciferous vegetables, including broccoli and cauliflower — in lunar soil, which was sampled directly from the moon from missions Apollo 11, 12 and 17.

To compare, researchers also planted the seeds in a lunar simulant, designed to closely mimic real lunar soil.

Anna-Lisa Paul, a research professor in the horticultural sciences department at the University of Florida and the study's first author, described the samples from the moon as "fine" and "powdery." It also "sticks to everything," Paul added.

The seeds started to sprout within days of planting.

"We planted them, walked away for a couple of days and then when we first went back in to take a look, it was amazing to see that every plant group, all the seedlings germinated," said Paul, who is also the director for the University of Florida's Interdisciplinary Center for Biotechnology Research.

Although all of the seeds sprouted, the ones that grew in lunar soil did not grow as "robust" as those in the control, according to the release. Some of the plants grown in the lunar soil samples had "stunted" roots and leaves, as well as some "reddish pigmentation," the release said.

After the plants had grown for 20 days, researchers harvested the plants and

prepared to study the plant RNA. The expressed gene patterns matched the way in which researchers had seen *Arabidopsis* react to stress before in other harsh environments, such as when soil carries excess salt or heavy metals, according to the release.

"Now that we have lunar soil that have been in contact with biology, we can begin to ask the question: how would you and how hard would it be to mitigate any of the adverse reactions that we saw?" said Robert Ferl, assistant vice president for research at the University of Florida and an author on the study.
