

英美报刊选读:

一、选择题 (2*20=40 分) 文体知识, 阅读材料中词汇、语言文化等;

1. 英文报刊的标题特色 (Title Features):

主要突出内容要点 (**Highlight key points**), 吸引读者注意并美化版面。同时标题字体的大小与所在位置还可以突显内容的重要性。

多用实义词 (**Notional words**), 省略虚词如冠词、联系动词、连词、介词和代词等以简短醒目。

标题常用一般现在时 (**present indefinite**), 常用非限定动词形式 (**Non-finite Verb**)。

标题通常省掉标点符号 (**punctuation mark**)。主要以名词性成分 (**nominal structure**) 开头, 罕用动词。

2. 英文报刊语言的 ABC 原则:

报道内容的精确性 **Accuracy**;

语言文字的简洁性 **Brevity**;

语句结构的清晰性 **Clarity**。

具体表现有如下几方面:

灵活采用省略句式介词和连词 **that** 常省略

常用镶嵌插入语(主要是为了解释或者明确主次突出重点)

句型松散, 环环相扣, 富有弹性。

注明出处, 形式多样: 消息来源可指名道姓, 也可含蓄表达。

3. 英文报刊语言的词汇特色 (Lexical features):

表述简洁具体 (**concreteness**), 多用日常词汇 (**Everyday vocabulary**), 罕用大词。

新词与生造词 (**Neologism and coinage**) 新颖别致。

缩略语 (**abbreviation**) 屡见不鲜。

4. 语篇形式 (forms of discourse) 主要指消息报道 (straight news reporting), 特写文章 (Featured Article) 和新闻评论 (News commentary) 三种形式。

消息报道是最基本的新闻体裁 (**News report is the most basic news genre**), 通常由标题 **headline**, 导语 **lead** 和正文 **body** 组成。消息报道的写作结构 (**Writing structure**) 有倒金字塔结构 **inverted pyramid form** 和金字塔结构 **pyramid form** 两种: 倒金字塔结构即倒叙法, 以重要性递减的顺序安排各项事实。金字塔结构则按时间顺序逐步展开。

报道可按内容分类 (**Reports can be classified by content**): 政治, 经济, 科技, 文化, 体育等等; 也可按性质分 (**By nature**) 为硬新闻 **hard news** 和软新闻 **soft**, 硬新闻指纯消息报道, 软新闻指人情味较浓轻松活泼的新闻。

Headline: The Headline is the title of the article which is made up of 10 words or less. This title has two purposes: to introduce the topic of the article and to capture the readers' interest, usually through controversial wording.

Summary Lead: The Summary Lead consists of the first paragraph, the 1-2 sentences consisting of less than 30 words that begin an article. **The content of this paragraph consists of the 5WH (who, what where, when, why, and how) of the article.**

特写文章 feature 是再现新闻事件人物和场景的形象化报道,文学笔触较浓,力求激发读者的好奇。常见的**特写类型**有:人物特写,事件特写,旅游特写,亲历特写等。

A feature story is all about the details: **painting a picture of a person, event, or place on the written page** so your topic becomes alive to the reader. A news feature is a type of feature story written in the style of a news article. It tackles a topic with painstaking detail and requires facts and research to back the story.

News features are increasingly found in publications, as they are more engaging for readers than hard news. To write a news feature, journalists must focus on a specific topic that can be thoroughly covered within a given word count. The topic must also be important and include firsthand accounts of real people, opinions from experts and facts and evidences to establish the truth and gravity of the issue. Though their topics have a local focus, news features should put everything together and show that there's larger context to the issue.

新闻评论 (News commentary) 类似议论文,通常由引论 **theme** 论证 **demonstration** 和结论 **conclusion** 组成,主要分社论 **editorial** 述评 **review** 和专栏文章 **column** 三类。

二、段落翻译 (英译汉) (30 分)

Uni1

1. Our model provides a biologically **plausible** way for **artificial neural networks** to learn new **visual concepts** from a small number of examples.

我们的模型为人工神经网络从少量的例子中学习新视觉概念提供了一种生物学上可行的方法。

2. The **computational** power of the brain's **hierarchy** lies in the potential to simplify learning by leveraging previously learned **representations** from a databank, as it were, full of concepts about objects.

大脑层级结构的计算能力在于通过利用以前从数据库中学习到表征来简化学习的潜力,因为数据库中充满了关于物体的概念

3. Our findings not only suggest techniques that could help computers learn more quickly and efficiently, they can also lead to improved **neuroscience** experiments aimed at understanding how people learn so quickly, which is not yet well understood.

我们的发现不仅表明技术可以帮助计算机更快、更有效地学习的技术，还可以改进**神经科学**实验，这些实验的目标是了解人们是如何如此快速地学习的，因为这一点目前还没有得到很好的理解。

Unit2

1. Boston Consulting Group (BCG), a **management consultancy**, foresees quantum computers improving the operating income of their users by between **\$450bn** and **\$850bn** a year by 2050. Unfortunately, big, stable **quantum computers** do not yet exist. But small, ornery, unstable ones do.

管理咨询公司波士顿咨询集团（BCG）预计，到 2050 年，量子计算机将使其用户的年营业收入提高 **4500 亿至 8500 亿美元**。不幸的是，大型、稳定的**量子计算机**目前还不存在。但小型、精致、不稳定的量子计算机已经有了。

2. IonQ, a firm in Maryland that has raised **\$84m**, uses trapped ytterbium ions, manipulated by lasers, to perform its calculations. Rigetti Computing, a Californian company which announced earlier this month that it would be building a quantum computer for the British government, Rigetti Computing employs **microwaves** to control pairs of electrons **flowing through superconducting circuits**.

马里兰的一家公司 IonQ 已经筹集了 8400 万美元，它使用被激光操纵的被捕获的镱离子来进行计算。本月早些时候，加州公司 Rigetti Computing 宣布将为英国政府建造一台量子计算机。Rigetti Computing 利用**微波控制流经超导电路**的电子对。

3. Microsoft, although very much not a startup, is working on a "**topological**" quantum computer that relies on the interactions of **super-cold electrons**. One **particularly well-financed** new firm is Psi Quantum, which does its computing with photons that run along waveguides etched onto ordinary **silicon chips**.

微软虽然不是一家初创公司，但正在研发一种“**拓扑**”量子计算机，它依赖于**超冷电子**的相互作用。一家**资金特别充足**的新公司是 Psi Quantum，该公司利用光子沿着蚀刻在普通**硅芯片**上的波导进行计算。

4. The industry has been cheered by Google's demonstration last year of "quantum supremacy", in which it used a NISQ machine to perform, with minutes of computing time, a calculation that would have taken thousands of years on classical hardware. Google's calculation was highly contrived and of little use in the real world. But it proved a point.

谷歌（Google）去年展示了“量子至上”（Quantum Supremacy），该公司使用 NISQ 机器以几分钟的计算时间完成了一项在经典硬件上可能需要数千年时间的计算，整个业界为此感到振奋。谷歌的计算非常做作，在现实世界中几乎没有用处。但它证明了一点。

Unit3

1. Other applications certain to get early 5G upgrades include mobile gaming and virtual reality (VR) apps that embed goggle-wearing users in 3D images.
其他肯定会很早升级 5G 的应用包括移动游戏和虚拟现实(VR)应用程序，这些应用程序将戴眼镜的用户嵌入 3D 图像中。
2. The speed and fast response of 5G networks will also affect the kit: VR goggles, for example, can be sleeker, lighter and less clunky.
5G 网络的速度快，反应速度也快，这将影响套件：例如，VR 眼镜可以更光滑、更轻，更不笨重。
3. It's a heads-up on open parking spaces, second-to-second data on surrounding traffic for driverless cars, local air-quality warnings, icy sidewalk alerts, and much more.
这是一个置于开放式停车场中的智能预告系统，向无人驾驶汽车提供周围交通的逐秒数据，当地空气质量警告，结冰的人行道警报等等。

Unit4

1. However, they are drawing the line somewhere, with the ethics committee's report forbidding the use of **modifications or implants** that might "affect their sense of humanity" or their ability to manage the use of force.
然而，他们在某处划清了界限，伦理委员会的报告禁止使用一些**修改或植入**，因为这可能“影响他们的人性意识”或管理使用武力的能力。
2. They have also banned modifications like cognitive implants that would prevent soldiers from exercising free will and any changes that might impact their reintegration into civilian life.
他们还禁止进行诸如认知植入之类的修改方式和任何变化，认知植入将阻止士兵行使自由意志，变化可能影响他们重返平民生活。
3. We've reached the point now where we could **potentially manipulate** people's DNA to breed into them extra strength, endurance and other things just as we do with animals.
我们现在已经到了一个地步，我们可以**潜在地操纵**人类的 DNA，让他们产生额外的力量、耐力和其他东西，就像我们对待动物一样。

Unit5

1. Xie's and Mukherje's key discovery involves the **self-assembly of bottlebrush polymers** at the nanometer length scale, which causes a solid-to-liquid transition in response to applied pressure. This material is categorized as a **yield-stress fluid**, meaning it begins as a semi-soft solid that holds its shape, like butter or toothpaste, but when sufficient pressure is applied, it liquefies and can be squeezed through a syringe.
Xie 和 Mukherje 的关键发现涉及纳米级**瓶刷聚合物的自组装**，这会导致固体到液体的转变，以响应施加的压力。这种材料被归类为**屈服应力流体**，这意味着它开始时是一种半软固体，可以保持其形状，如黄油或牙膏，但当施加足够的压力时，它会液化，可以通过注射器挤压。

2. The ability to 3D-print **bottlebrush elastomers** makes it possible to **leverage** these unique **mechanical properties** in applications that require careful control over the dimensions of objects ranging from **biomimetic tissue** to high-sensitivity electronic devices, such as touch pads, **sensors and actuators**.

3D 打印瓶刷弹性体的能力使其能够在需要仔细控制物体尺寸的应用中利用这些独特的机械性能，从仿生组织到高灵敏度电子设备，如触摸板、传感器和致动器。

3. "We wanted the material and the printing process to be as clean and as easy as possible, so we played a chemistry trick with solubility and self-assembly, which enabled the solvent-free process. The fact that we don't use solvent is a tremendous advantage."

“我们希望这种材料以及打印过程尽可能干净、简单，所以我们玩了一个溶解度和自组装的化学把戏，实现了无溶剂工艺。事实上，我们不使用溶剂是一个巨大的优势。”

4. The application of the resulting curve in actual computation is accomplished by table look-up.

通过查表，即可应用实际计算中所得到的曲线。

三、新闻摘要（30 分），根据一篇新闻报道，写一篇新闻摘要。

5W1H: when where what why who how

跨文化交际：

一、 概念定义（10 题，20 分）选词填空，10 个备选短语

跨文化：intercultural；

认知：perception；

文化模式：cultural patterns；

跨文化能力：intercultural competence；

偏见：prejudice；

民族中心主义：ethnocentrism；

全球化：globalization；

刻板印象：stereotyping；

交互：interaction；

- | | |
|-------------------|---------------------------------------|
| _____ 1) source | _____ 7) encoding |
| _____ 2) message | _____ 8) response |
| _____ 3) channel | _____ 9) sender |
| _____ 4) feedback | _____ 10) noise |
| _____ 5) code | _____ 11) receiver |
| _____ 6) decoding | _____ 12) intracultural communication |
- the person that receives the message in the communication
 - communication between people from the same cultural background
 - the interlocutor who initiates the message
 - any systematic arrangement or comprehensive collection of symbols
 - the interpretative process of assigning meaning to a message
 - the content of interaction
 - information generated by the receiver and made available to a source that allows the source to make qualitative judgments about the communication while it is taking place
 - the act of putting an idea or thought into a code
 - the mode by which a message moves from the source of the message to the receiver of the message
 - the reaction of the receiver to the decoded message
 - any factor that hinders or distorts the reception of messages
 - any person that produces the message

message code channel feedback noise decoding encoding receiver

response source

In this dialogue, A wants to invite B to go to see the movie with him. A starts the dialogue and he is the _____ — the point at which information or interaction originates. A organized his idea and puts it into words — verbal _____, such a process is called _____. A expresses his idea — the _____ by way of talking, i. e. the verbal _____. B, the _____ of the message, after interpreting the message through the process of _____, gives his _____ to the coming information. The entrance of the teacher interferes with the talk and is considered “_____” of the interaction. A knows that his invitation has been accepted and decides to talk about it later. Here the receiver B’s response to the message enables the source or sender A to understand how his message has been taken, such information is called _____.

二、 知识点单选题（15 题， 30 分）

三、 案例简答、分析题（2 大题， 50 分） 案例一： 简答题

1. The definition of culture（文化的定义）：

culture is the full range of learned human behavior patterns.

(对于人类学家和其他行为科学家来说)文化是人类学习行为模式的全部范围

Culture is the complex whole which includes belief, art, morals, law, custom, and any other capabilities and habits acquired by man as a member of society. 文化是一个复杂的整体，包括信仰，艺术，道德，法律，习俗以及人类作为社会成员获得的任何其他能力和习惯。

2. The three layer of culture（文化的三个层面）

first layer : the body of cultural traditions (文化传统的主体)

second layer: subculture (亚文化)

third layer: cultural universals (文化的普遍性)

3. The features of culture（文化的特征）

culture is learned behavior 文化是后天习得的行为

culture is usually acquired unconsciously 文化通常是无意识获得的

culture is shared among its members 文化在其成员之间共享

culture is persistent and enduring 文化是持久的

culture manifests itself both implicitly and explicitly 文化既是隐式又是显式

culture is adaptive and changeable 文化适应性强且多变

culture is relational 文化（内在）是有联系的

4. The elements of culture（文化的要素）

religion 宗教； history 历史； values 价值观； social organizations 社会组织； language 语言

5. Definition of human communication（人际交往的定义）：

We propose that human communication is a dynamic process in which people attempt to share their thoughts with other people through the use of symbols in particular settings.

我们认为，人类交流是一个动态的过程，在这个过程中，人们试图通过使用特定的符号与他人分享自己的想法。

6. features of communication（沟通的特点）

Dynamic 动态的； Interactive 交互的； both verbal and nonverbal 言语和非言语；

intentional or unintentional 有意或无意； rule-governed 规则管理；

depends on the use of symbols 象征性的； Irreversible 不可逆的；

In both a physical and a social context 在物质和社会环境中

7. Identity（身份）：

(Identity is) a person's conception of self within a particular social, geographical, cultural, and political context...Identity gives the individual a sense of self and personhood.

(身份是)一个人在特定的社会，地理，文化和政治背景下的自我概念.....身份赋予个人一种自我和人格感。

8. underlying assumptions about context 关于语境的基本假设

Communication is rule governed 沟通受规则支配

Context helps specify communication rules 语境有助于指定交流规则

Communication rules are culturally diverse 沟通规则在文化上是多种多样的

9. Cultural patterns (文化模式) 的定义

Cultural patterns (value orientations) refers to culturally based beliefs, values, attitudes, and behaviors shared by members of a particular culture.

文化模式(价值取向)是指特定文化的成员共有的基于文化的信念, 价值观, 态度和行为。

10. Three categories of language (三类语言):

Ideas (beliefs, values) 想法(信念, 价值观)

Behaviors (language, gestures, custom/habits) 行为(语言, 手势, 习惯)

Products (literature, folklore, art, music, artifacts) 产品(文学, 民俗, 艺术, 音乐, 人工制品)

11. Differences between Verbal and Nonverbal Communication (言语和非言语交际的区别)

The flow of verbal messages can be consciously controlled while nonverbal behaviors are controlled by biological necessity.

言语信息的流动受意识控制, 而非言语行为受生物必要性控制。

Verbal communication is expressed word by word and sentence by sentence while several nonverbal behaviors may happen at once.

言语交际是逐词逐句表达, 而几种非言语行为可能会同时发生。

Only part of nonverbal communication is available as international or interracial language. Nonverbal communication may lead to misunderstanding.

非语言交流中只有一部分可以作为国际语言或种族语言使用。非语言交流可能会引起误解。

Nonverbal communication usually comes first in our life than verbal communication.

非言语交往通常比言语交往更重要。

Nonverbal message are used to clarify, elaborate, explain, reinforce and repeat the meaning of verbal messages. And also nonverbal messages are used as a substitute for the verbal channel when verbal channel is blocked.

非语言信息用于澄清, 阐述, 解释, 加强和重复口头信息的含义。当语言通道被阻塞时, 非语言消息也可以代替语言通道。

12. Two Classifications of Nonverbal Communication (非言语交际的两种分类):

Those produced by body (身体产生的):

appearance 外貌; posture / gestures 姿势/手势; facial expression 面部表情; eye Contact 眼神接触; touch 触碰; paralanguage 副语言

Those connected with the setting (与环境有关的):

space 空间; time 时间; silence 沉默

13. Functions of prejudice (偏见的功能):

Ego-Defensive 自我防御; Utilitarian 功利; Value-Expressive 价值表达; Knowledge 知识

14. Causes of prejudice (偏见的原因):

Societal Sources. 社会性来源; Maintaining Social Identity 维护社会认同;
Scapegoating 背叛

15. Characteristics of Ethnocentrism (民族中心主义的特征):

three levels: positive, negative and extremely negative 三个层次: 积极、消极、
极度消极; universal 普遍的; contributes to cultural identity 有助于文化认同

16. Coping with culture shock (应对文化冲击):

Make friends 交朋友; Learn about the host culture 了解东道国文化

Be patient 有耐心; Participate in cultural activities 参加文化活动

四、 案例简答、分析题 (2 大题, 50 分) 案例二: 案例分析题

(从三个角度对语篇中体现的文化差异进行合理分析)

Low vs. High Uncertainty Avoidance (“高权力距离”与“低权力距离”国家)

Low Uncertainty Avoidance (e.g., India, USA)

High Uncertainty Avoidance (e.g., Japan, Spain)

According to Hofstede's research, people in "low power distance" countries emphasize individual ability and credit, and equality of rights and relations between people, while "high power distance" countries, such as China and Japan, emphasize status, experience, age, seniority, etc., and there is a level gap between people.

根据霍夫斯特的调查研究,“低权力距离”国家的人强调个人的能力和信用,人与人之间权利和关系的平等,而“高权力距离”国家,如中国、日本,强调地位、经验、年龄、资历等,人与人之间存在级别差距。

Low vs. High Context Communication (“低语境”和“高语境”交流)

Low Context (Direct) (e.g., Germany, USA)

High Context (Indirect) (e.g., Korea, Japan)

According to Hall's "high context" and "low context" theories, Japan is a typical high context country. Its communication methods are implicit and euphemistic. It will not easily express dissatisfaction in front of people, and will rely more on nonverbal communication. The United States belongs to a "low context" country, which is used to direct language communication.

根据霍尔(Hall)的“高语境”和“低语境”理论,日本是典型的高语境国家,交流方式含蓄委婉,不会轻易在众人面前表达不满,会更多的依赖于非言语交流。而美国属于“低语境”国家,习惯直接的语言交流方式。

Individualism vs. Collectivism (个人主义与集体主义)

Individualism (e.g., USA, Australia, Canada)

Collectivism (e.g., Korea, China, Mexico)

The United States is a country that emphasizes individualism, while Japan pays more attention to the collective. In the United States, individual creativity and competition are encouraged. Japan is a typical collectivist country. In Japan, individuals should be loyal to the collective, and the members of the collective should be united. They do not tend to highlight individual performance, but emphasize collective cooperation.

美国是非常强调个人主义的国家，而日本更注重的是集体。在美国鼓励个人创新，提倡竞争。而日本是典型的集体主义国度，在日本个人要忠实于集体，集体内部的成员要团结一致不倾向于突出个人业绩。而是强调集体协作。

Egalitarian vs. Hierarchical (Power Distance) (平等主义和等级制)

Egalitarian(eg. Australia, Canada, USA)

Hierarchical (e.g. Mexico, India, Korea)

Thailand is a country with a strong sense of hierarchy. Social life in Thailand emphasizes the concept of hierarchy and relies on hierarchical relations. In social institutions such as companies, the formal organizational structure is emphasized, and all levels maintain a certain degree of stability. In the price concept of British culture, the distance between power is very small. Besides specific work, people are equal. Everyone has the freedom to choose.

泰国是等级观念很强的国家。泰国的社会生活强调等级观念，依赖于等级关系。而在公司等社会机构中，强调正式的组织结构，各个等级保持一定的稳定性。在英国文化的价位观中，权力之间的距离很小。具体工作之外，人们之间是平等的。每个人都有选择的自由。

Cultural differences in body language use (肢体语言使用的文化差异)

The contradiction reflected in this case is very obvious, which is a misunderstanding caused by the cultural differences in the use of body language. Different cultures have different understanding of smile. Especially in the special context of apology. When Chen Jun apologizes to Peter, he tries to speak with a smile to show politeness and sincerity. For Peter, smiling in this case is a sign of disrespect and lack of sincerity.

本案例所体现的矛盾非常明显，是由于肢体语言使用的文化差异而导致的误解。不同文化对于微笑的理解是不同的。尤其是在道歉这种特殊的语境下。陈军向彼得道歉时，尽力微笑着说话以显示礼貌和诚意，而对于彼得来说，这种情况下微笑是不尊重的表现，也是缺乏诚意的表现。

Cultural differences in interpersonal communication (人际交流方式的文化差异)

One of the main reasons for such a bad result is that there are great differences between China and the United States in the way of interpersonal communication, specifically in the way of answering questions, but the two parties concerned are not aware of this. This cultural difference is reflected in the fact that Chinese culture focuses on maintaining a harmonious interpersonal communication environment for groups, while American culture focuses on creating an interpersonal communication environment that emphasizes individuality.

产生这样糟糕结果的一个主要原因是中美两国在人际交流方式上，具体来说是在回答问题的方式上，存在巨大差异，而当事双方却并没意识到这一点。这种文化差异体现在中国文化注重维护群体和谐的人际交流环境，而美国文化则注重创造一个强调坚持个性的人际交流环境。

美国文化

Americans have always been very direct and clear, which is also their consistent way of thinking. Americans pay attention to the development of individuals in enterprises. Through the display of individual talents, we can achieve the brilliance of the enterprise and achieve the ideal goal. This may have much to do with the individualism that the United States has always advocated. They attach importance to independence, be frank, and have a weak sense of rank and identity. They believe that it is natural and justifiable to pursue personal interests. They regard Chinese etiquette, identity and euphemism as pretense and lack of sincerity. American culture advocates the bold and direct expression of one's own ideas.

美国人一向很直接明了，这也是他们一贯的思维方式。美国人注重个人在企业的发展状况。通过个人才华的施展来取得企业的辉煌和达到理想目标。这也许与美国一贯提倡的个人主义有着莫大关系。他们重独立、多坦率，等级和身份观念淡薄，认为追求个人的利益是天经地义、无可厚非的，他们对中国式的重礼仪、身份和多委婉，却视为假装和缺乏真诚。美国文化提倡大胆直接表露自己想法。

处理文化差异

Both sides should have some understanding of each other's cultures, and should be clear about the different views of the two cultures on individuals and different ways of communication. Don't always look at things from your own point of view.

双方应该对彼此的文化有所了解，应该清楚两种文化对个人的不同看法和不同的交流方式。不要总是从自己的出发点看问题。

Only by understanding the basic conditions of different cultures, can people be tolerant when communicating with people with different cultural backgrounds, rather than denying and criticizing them all.

只有了解了不同文化的基本状况，人们才能在与有着不同文化背景的人交往时保持宽容，而不是一概否定、批评。

The crux of the matter lies in the two parties. However, if there is an **intermediary** who understands the cultures of both sides to make an appropriate explanation, it should be possible to resolve or even resolve the cultural conflict.

问题的关键是在于这两位当事人。但是如果有一个了解双方文化的**中间人**适当做出解释，应当是可以化解甚至是化解文化冲突的。

TABLE 4.13 The Influence of Cultural Patterns

CULTURAL PATTERNS	
Individualism vs. Collectivism	
<i>Individualism</i> (e.g., USA, Australia, Canada)	<i>Collectivism</i> (e.g., Korea, China, Mexico)
• Focus is on the individual & self-promotion • Independency • Task dominates relationship • Social obedience through sense of guilt	• Focus is on the group/affiliations & self-criticism • Interdependency • Relationship dominates task • Social obedience through sense of shame
Egalitarian vs. Hierarchical (Power Distance)	
<i>Egalitarian</i> (e.g., Australia, Canada, USA)	<i>Hierarchical</i> (e.g., Mexico, India, Korea)
• Horizontal relationships • Subordinates consulted • Equality expected	• Vertical relationships • Subordinates informed • Inequality accepted
Low vs. High Uncertainty Avoidance	
<i>Low Uncertainty Avoidance</i> (e.g., India, USA)	<i>High Uncertainty Avoidance</i> (e.g., Japan, Spain)
• Change is normal and good • Few behavioral protocols • Greater cultural diversity	• Change is disruptive and disliked • Many behavioral protocols • Less cultural diversity
Monochronic vs. Polychronic (Use of Time)	
<i>Monochronic</i> (e.g., Germany, USA)	<i>Polychronic</i> (e.g., Arabs, Africans)
• Time is linear and segmented • Focus on a single task • Adherence to schedules	• Time is flexible • Focus on multiple tasks • Weak ties to schedules
Low vs. High Context Communication	
<i>Low Context (Direct)</i> (e.g., Germany, USA)	<i>High Context (Indirect)</i> (e.g., Korea, Japan)
• Meaning reliant on verbal message • Nonverbal communication low importance • Silence is avoided	• Meaning can be derived from context • Nonverbal communication high importance • Silence is normal
Low vs. High Face Concerns	
<i>Low Face Concerns</i> (e.g., Canada, USA)	<i>High Face Concerns</i> (e.g., Korea, China)
• Conflict/disagreement is constructive • Concern for self-face	• Conflict/disagreement is threatening • Concern for mutual/other-face

Source: E. McDaniel, "Crossing Cultural Borders: Intercultural Communication from the Interpretation and Translation Perspective," *Journal of Interpreting and Translation Studies*, 14:2 (2011), 359.
