Part III. Case Study Analysis (40 points)

Directions: Read the following scenario and write your answers on the ANSWER SHEET.

Scenario: Negotiation Between an American Software Company (Company A) and a Japanese Firm (Company B)

Meeting Opening:

The representative of Company A pushes a printed contract across the table. "Here's our proposed agreement, including deliverables, timelines, and penalties for delays. Let's go through it point by point." The lead representative of Company B nods politely, takes the document, but does not open it immediately. "Thank you for your thorough preparation. We will review this carefully." A manager of Company B asks the his colleagues directly, "Can you confirm acceptance by next Friday? We need to move quickly." Other members remain quiet, occasionally exchanging brief comments in Japanese. When pressed on specifics, they respond, "This may require further discussion."

Discussion Phase:

An engineer of Company A points to a clause, "If testing is delayed beyond the deadline, Section 5.2 states a penalty. Do you agree?" The Japanese sides keep silent. After a pause, the engineer rephrases, "Is there a problem with this? We need a clear answer."

The manager of Company B smiles and shifts focus, "Your technical expertise is impressive. We value a strong, lasting partnership." After the meeting, the Japanese team leader quietly tells his assistant, "We must consult with executive before proceeding."

Follow-Up Reactions:

Company A's internal email: "The Japanese side won't commit to anything. Are they avoiding the issues?"

Company B's internal memo: "The Americans demand instant decisions, but unilateral commitments could disrupt harmony. Suggest informal discussions first."

Questions:

36. (15分) How does Hall's theory explain the communication clash between the two teams? Provide two specific examples from the scenario that illustrate each culture's communication style.

37. (25分) Using Hofstede's cultural dimensions, analyze why the Japanese team prioritizes group harmony and consensus over immediate decisions, while the American team expects clear, direct answers. (at least two relevant dimensions)
